

PLEIN AIR WORKSHOP  
JOHN LASATER AND JASON SACRAN  
SEPTEMBER 30 - OCTOBER 3, 2015

**John Lasater and Jason Sacran**, are teaming up to teach a focused 4-day plein air workshop. Tinged with good-natured fun, this workshop will teach you serious sophistication in your plein air method.

Known for their string of awards at national competitions, Jason and John excel at design, dramatic color mixing, looseness and edge-control. And now, with years of teaching under their belts, expect to be encouraged and challenged by their demonstrations and hands-on help. Here's what students of Jason and John have said about their workshops:

"(They) explained and demonstrated how to see a subject, organize its basic shapes into a pleasing composition, and translate it into an attractive painting. These concepts were clarified and simplified in ways that finally made sense to me after many years of studying art, and helped each of us apply what we learned in our own style. It was not only beneficial, but fun!"

—Betsy S, Missouri

"I felt that after you got to know our individual abilities, you really fine-tuned your comments for each of us. I also appreciated how open you were in answering questions...and your humor. Your workshop left me feeling prepared, motivated and inspired to continue my own practice. Thanks, again, for being so generous with your talent and knowledge."

—Jenny W, Arkansas

"You taught me something more than 'how to paint what I see' more effectively, although I did learn that. I came away from the workshop understanding more about creating art. Every person in the workshop produced work that seemed to reflect their own spirit and their own journey. It was a pretty special learning experience."

—Kathryn F, Missouri
